

Giulia Stellari

Born: 3 February 1981

Nationality: Italian

Giulia Stellari has a Bachelor of Arts in Biology from Harvard University. In 2004 she started working as a graduate research assistant in the laboratory of Molly Jahn at Cornell University focusing on Molecular breeding, Genomics, Biochemistry and Genetics. She successfully completed her PhD program in 2009. The same year, she co-founded AgSquared, a technology platform helping farmers to improve productivity, profitability, and sustainability by designing software tools for task management, farm planning, and cost accounting. From 2015 until 2022 she was active at Unilever as Director for Sustainable Sourcing, Digital and Carbon Solutions. In March 2022, she joined Fall Line Capital, a private equity firm focused on investing in US farmland, ag tech and food tech startups. She works across the firm's investment areas, leading ESG risk management and impact assessment for the firm. Giulia has been appointed to the EU Expert Group on Carbon Removals and is a member of the SBTi Technical Advisory Group and Field to Market's Innovative Finance Committee.

By her presence in the Board of Directors of SIPEF, Giulia will be able to support the company in its structural sustainable and scientific development and management.
